

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS  
International General Certificate of Secondary Education

**MARK SCHEME for the October/November 2010 question paper  
for the guidance of teachers**

**0610 BIOLOGY**

**0610/62**

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	<b>IGCSE – October/November 2010</b>	<b>0610</b>	<b>62</b>

Questions	Mark Scheme		Guidance/comments
<b>1 (a)</b>	unripe fruit – smaller / seeds white freshly harvested – larger / seeds getting darker stored, ripe fruit – wrinkled /darker in skin colour/ seeds darker;;;		
			small middle large
			number of seeds 1 1 3 / more
			colour of seeds white white dark / black
			size of seeds / maturity small / immature / under-developed larger / more mature / developed larger / mature / developed
			core / middle region / aw undeveloped developing developed / larger
			sepal / stigma / style / flower remains present less clear smaller / shrivelled / aw
			fleshy wall / mesocarp thin developing thicker
			skin / epicarp / outer layer outer covering of young fruit / aw thin / pale thicker / darker
			<p>I. ref to petals/anthers</p> <p>A. relevant comment not linked to a particular stage.</p> <p>I. comments on roots / leaves / stalk / cell wall.</p> <p>I. seeds – growing as confused with germination.</p> <p>I. comment on size of apple as instructed in question.</p>

[max 3]

<b>Page 3</b>	<b>Mark Scheme: Teachers' version</b>	<b>Syllabus</b>	<b>Paper</b>
	<b>IGCSE – October/November 2010</b>	<b>0610</b>	<b>62</b>

<b>(b)</b>	<b>one safety feature</b> – max;  starch iodine solution; black if starch present;  reducing sugar make solution / AW; add Benedict's solution; heat; green / yellow / orange / red; [int max 3]	[max 5]	Water bath / tongs / lab coat / hair tied back. I. gloves. A. drops of iodine / iodine in KI. A. black / purple / blue I. heating / ethanol.  A. make an extract / chopping up and adding water / AW A. Fehlings / Clinistix. I. warm Must match reagent used. Clinistix purple / dark blue for positive. I. brown alone. A. red / reddish brown. I. use of ethanol. If used biuret reagent – do not award marks for reducing sugar.			
<b>(c) (i)</b>	<table border="1"><tr><td>66.3</td></tr><tr><td>93.5</td></tr><tr><td>109.5</td></tr></table>	66.3	93.5	109.5	[1]	All correct = 1  If 30.5 / 27.2 / 16.0 – no mark but e.c.f. for plot.
66.3						
93.5						
109.5						
<b>(ii)</b>	<b>A</b> – axes and labels and orientation;  <b>S</b> – scale – suitable to fill more than half the grid and even;  <b>P</b> – plot;  <b>L</b> – line;  Score marks by a series of ✓ or X in order.	[4]	x-axis – time in days and y-axis – loss in mass (of apples ) / g If plot mass – 2nd column in error Allow S and L 2 MAX.  Non-linear scale A only.  Allow +/- half a small square. Must plot zero. For those who plot only the last 3 values: Allow A, S and L = 3 max.  Allow line of best fit – if correct and balanced plots each side of the line. Allow a smooth curve but not if 'sagging' and too thick to identify points. Allow points joined by ruled lines. No extrapolation. Histograms / bar charts allow A, P and neatness = 3 max. Allow label for columns in the middle not to one side.

	<b>IGCSE – October/November 2010</b>	<b>0610</b>	<b>62</b>

<b>(iii)</b>	respiration / fermentation / oxidation; transpiration / evaporation / dehydration / water loss / drying; decomposition / decay / action of microbes / rotting / AW;	[max 2]	Allow aerobic and anaerobic respiration. <b>A.</b> excretion of CO <sub>2</sub> <b>I.</b> reduction / metabolic reactions/ / hydrolysis.  <b>I.</b> eating / osmosis.
<b>(iv)</b>	1. keep in cooler conditions / in a fridge / not too hot / AW ; 2. cover apples / wrap apples; 3. keep in the dark or out of sunlight; 4. under different gases / nitrogen / carbon dioxide/ less oxygen / air tight / vacuum; 5. keep separated / cushioned / AW; 6. keep away / separated from ripe fruits;	[max 3]	<b>R.</b> freezer  <b>R.</b> use of plastic bags / cellophane / clingfilm. <b>A.</b> paper / foil.  Idea to prevent bruising. <b>I.</b> moist or dry conditions / well ventilated / wash and disinfect / pesticides / preservative / antioxidants.
	<b>[Total: 18]</b>

	IGCSE – October/November 2010	0610	62

2 (a)	drawing: <b>O</b> clear outline and no heavy shading; <b>S</b> equal size but not smaller than 6 cm; <b>D</b> both valves and hinge; <b>ONE</b> label: hinge / joint / ligament / shell / exoskeleton / muscle attachment / AW;	[4]	Allow stippling but not blocked in shading  <b>I.</b> thick wall / covering / coat / epidermis / testa / outer layer. Score marks by a series of ✓ or X in order for drawing but tick by correct / accepted label.
(b)	protective / camouflage / shelter / safety /hide; hard / tough/ rigid / thick / heavy; from predators / being eaten / attacked / prevent drying out / pressure or waves or depth of water / current;	[max 2]	<b>A.</b> if this is implied
(c) (i)	<u>mollusc</u> ;	[1]	<b>A.</b> close spelling
(ii)	size in Fig. 2.2 .....38...(mm); <i>NB length</i> .  scale is 3 mm = 25 mm – part of working; actual size = $\frac{38 \times 3}{25} = 4.56$ mm or 0.456 cm; 4.6	[3]	<b>A.</b> +/- 1 mm for length 37 – 41 mm From diagram check if width has been measured in error. ecf.  Accept correct word formula = one mark  Accept actual size in range of 4.4 – 4.8 mm Allow correct measurement in cm. If correct answer – but no working shown $\sqrt{\sqrt{}} = 2$
<b>[Total: 10]</b>

	<b>IGCSE – October/November 2010</b>	<b>0610</b>	<b>62</b>

<b>3 (a)</b>	feature	submerged leaves	floating leaves	[max 2]	<p>Descriptions appear either in table form or all text and run together – dredge.  They / it = submerged leaves.  <b>I.</b> reference to flowers.  Answer does not have to be comparative. <b>A.</b> description of one type of leaf.</p> <p>Award correct biology.</p>
	shape	thin / narrow / elongated / divided / branched / ORA	broad / entire / undivided / ORA		
	surface area	small	large		
	number	2 / less / fewer	3 / more		
	leaf stalk / petiole	not present / leaf attached	present / long		
	veins	none / not visible	present / network		
<b>(b) (i)</b>	palisade mesophyll; spongy mesophyll;      label lines or brackets			[2]	Row of cells below the upper epidermis to top of air spaces. Exclude the lower epidermis but from boundary of large air spaces. Do not accept vascular bundle in the centre. Label lines can be to one cell or to an air space rather than a bracket. Check the names are not inverted. Independent label marks
<b>(ii)</b>	palisade mesophyll: more light/ more or lots of chloroplasts / more chlorophyll; arrangement of cells near upper surface; photosynthesis;  spongy mesophyll : air spaces / air gaps; less light/ less chloroplasts / less chlorophyll; photosynthesis: gas / CO <sub>2</sub> / water vapour / oxygen / air circulation / gas exchange;			[max 3]	<b>A.</b> 'middle tissue' as spongy mesophyll. Photosynthesis only once Not separated by naming the tissue – then <b>A.</b> correct references to photosynthesis / gas exchange / air spaces for MAX 2 <b>I.</b> reference to vascular tissue.
