## **UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**International General Certificate of Secondary Education** 

## MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

## 0610 BIOLOGY

0610/21

Paper 2 (Core Theory), maximum raw mark 80

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

## **General notes**

Do not exceed the section sub-totals or question maxima.

Symbols used in mark scheme and guidance notes.

/ separates alternatives for a marking point

; separates points for the award of a mark

MP mark point – used in guidance notes when referring to numbered marking points

ORA or reverse argument / reasoning

OWTTE or words to that effect

A accept – as a correct response

R reject – this is marked with a cross and any following correct statements do not

gain any marks

I ignore / irrelevant / inadequate - this response gains no mark, but any following

correct answers can gain marks.

( ) the word / phrase in brackets is not required to gain marks but sets the context of

the response for credit.

e.g. (waxy) cuticle. Waxy not needed but if it was described as a cellulose cuticle

then no mark is awarded.

mitosis underlined words – this word only

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper	
	IGCSE – May/June 2011	0610	21	

	cat	1a	1b	2a	2b	3a	3b	4a	4b	5а	5b	cat family	note – no mark for cat A
	Α											member <i>L. caracal</i>	I – all ticks and crosses in the grid
	B C											A. jubatus; P. leo;	A – if generic name letter missing credit species name alone
	DE											N. nebulosa; L. rufus;	R – if wrong generic name letter given I – common names such as lion, tiger etc.
	F											P. tigris;	,
е	each correctly identified cat – 1 mark [5]												
	[Total: 5]												

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

2	(a)	(i)	a diet that contains all the necessary nutrients / OWTTE; in the required quantities / OWTTE; for sex / age / activity; to maintain health / for healthy living;	A – ref. to 7 nutrients, list of all 7 necessary nutrients A – amount, not in excess
			any three – 1 mark each [3]	
		(ii)	two of – carbohydrates / protein / water; [1]	<ul><li>note – two responses for 1 mark.</li><li>A – starch / sugar as alternatives for carbohydrate</li></ul>
	(b)	too 1 2 3	ittle fibre – fibre aids peristalsis / aid movement through alimentary canal / OWTTE; can lead to constipation; associated with (colon) cancer;	I – ref. to diarrhoea
		any	two – 1 mark each [2]	
		1 2 3 4	nuch fat – body stores (excess) fat; can lead to obesity / overweight; associated with coronary heart disease; increase risk of diabetes two – 1 mark each [2]	<ul> <li>A – other descriptions of overweight</li> <li>A – specific correct ref. to symptoms e.g. heart attack, block arteries</li> <li>I – heart problems as too vague</li> </ul>
	(c)	1 2 3 4 5 6 7	calcium used in bones / teeth; strengthens / hardens bone / teeth / enamel; lack leads to rickets (in bones); bones lack rigidity / become bent / curved; teeth more prone to disease / decay / cavities; involved in clotting / OWTTE; blood may not clot properly;	
		any	three – 1 mark each [3]	
			[Total: 11]	

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

3	(a)	M – <u>urethra;</u> N – sperm duct / vas deferens; O – <u>ureter;</u>	[3]	
		testes – produce sperm / male gametes / sex cells; produce / release testosterone;	[2]	I – stores sperm A – male hormone
		<pre>prostate gland – produces (part of) seminal fluid / semen / fluid that activates / nourishes sperm / fluid for sperm to swim in;</pre>	[1]	
		scrotum – supports / holds / contains testes (outside of body cavity) / allows testes to stay below body temperature / cool;	[1]	
	(b)	<ul><li>(i) X must be clearly linked to sperm duct;</li><li>(ii) condom;</li></ul>		R – X on urethra; If more than 1 X on Fig, if any wrong – no mark
		latex / rubber is impermeable (to body fluids / semen);		
		prevents female body fluids coming in contact with male tis / male body fluids coming in contact with female tissue;		A – ref. to causative agent in lieu of body fluid A – prevents contact / exchange of body fluids; I – ref. to contraception
	(	(iii) HIV / syphilis / gonorrhoea / (genital) herpes / NSU chlamydia;	[1]	A – AIDS and any other valid example
		[Total:	11]	

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

4	(a)	(i)	<ul><li>A – sensory neurone;</li><li>B – motor neurone;</li><li>C – synapse;</li></ul>	A	A – nerve fibre, nerve
			<b>D</b> – relay neurone; [4]	А	A – intermediate, internuncial, connector neurone
		(ii)	muscles; glands; [2]	A	A – in either order – specific examples
	(b)	(i)	response (to a stimulus) that is automatic / involuntary / OWTTE; and rapid; [2]		A – ref. to a correct sequence of neurones MAX 1  A – descriptions of a reflex
		(ii)	withdrawal reflex / knee jerk reflex / iris reflex; [1]	A	A – any other valid reflex action
			[Total: 9]		

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

(a) (i)	ovar	y / testis;	ſ	[1]   I	<ul> <li>gonads, sex organs, gametes</li> </ul>
(ii)	ovar	y / anther;	I	[1]	l – gametes, ovum A – ovule / stamen / carpel
	MP	differences		٦٢	t evalur stamen sarper
		mitosis	meiosis		
	1	chromosome number stays the same /	halves chromosome number / produces		A – cells for nuclei
	2	produces diploid nuclei forms body cells	haploid nuclei;	41,	A – any other valid point
	3	cells have paired	forms gametes; cells have unpaired	<b>∃</b> ∣′	any other valid point
	3	chromosomes	chromosomes;		
	4	·			
	5	forms two nuclei	forms four nuclei;		A – cells for nuclei
	6	new nuclei genetically identical to original / one another	new nuclei genetically different to original / one another		A – cells for nuclei
	7	comprises one division	comprises two divisions;		
(b) (i)	chan	three – 1 mark each age in gene / DNA; age in the structure / number		[3]	
(ii)	1 >	Crays; ιltra violet light;	•	-   	– genetic material
		onising radiation;		I	– pollution, smoking,
	4 (	mutagenic) chemicals;		I	A – alpha, beta, gamma rays, radioactivity, nuclear fallout – radiation
			T. C.	21	
	any t	two – 1 mark each	l	[2]	A – any named mutagen, cigarette tar

Page 8	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

6	(a) (i)	photosynthesis;	[1]	
	(ii)	chlorophyll;		I – chloroplasts
	(iii)	12 000 kJ;		
	(iv)	bacteria; fungi;	[2]	
	(v)	8000 / 100 000 × 100; 8 (%);	[2]	<b>note</b> – if correct answer given but no working then award both marks
	(vi)	<ul> <li>energy released / lost by respiration;</li> <li>used in metabolism / chemical reactions;</li> <li>used in body activities / movement / passage of impulse</li> <li>lost as heat (to the environment);</li> <li>lost in excreta;</li> <li>lost in decomposition at death;</li> <li>not all of primary consumer is eaten;</li> </ul>	es;	R – energy used in or for respiration e.g. digestion
		any three – 1 mark each	[3]	
		up of organisms of one species; ng in same area and at the same time; [Total:	[2]	
		[10tal:	12]	

Page 9	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

7	(a) (i)	<b>D</b> – next to relevant arrow; [1]	<b>note</b> – for any letter if it is written more than once on Fig. only award mark if all are correct
	(ii)	P – next to relevant arrow;	awara man ni an are serrest
	(iii)	R – next to relevant arrow;	
	(b)		Responses must be in context of increasing activities since 1850
	1	use of fossil fuels;	to gain credit
	2	because of increased energy demands;	A – refs to industry, factories
	3	use of vehicles;	
	4	less photosynthesis;	A – less carbon dioxide being used up
	5	because of deforestation / OWTTE;	A – decreased numbers of trees
	6	burning of trees / forests;	
		,	A – increased population (more respiration)
	any	four – 1 mark each [4]	A – any other valid point e.g. detail / explanation of one of the MPs
		[Total: 7]	

Page 10	Page 10 Mark Scheme: Teachers' version		Paper
	IGCSE – May/June 2011	0610	21

8	(-	a)	(i)	aorta and pulmonary vein(s); [	[1] <b>note</b> – two responses for 1 mark
			(ii)	<b>P</b> ; [	[1]
		(	(iii)	<b>Q</b> / <b>R</b> ;	[1] A – Q and R
	(	b)	2 3 4 5	contraction of muscles / wall; of <u>left</u> ventricle; increases pressure; forces cuspid / bicuspid / S valve shut; forces semi lunar / R valve open; three – 1 mark each	I – ref. to P I – ref. to Q [3]
	(	c)	(i)	coronary artery / vessels;	
				hepatic artery; hepatic portal vein; [2	A – in either order
				[Total: 9	9]

Page 11	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0610	21

9 (a) 1 evaporation of water from leaf / stem / plant;

2 diffusion of water vapour;

- 3 through stomata;
- 4 down concentration gradient;

any three - 1 mark each

[3]

No credit for effects of transpiration

I – ref to mineral salts

A – from high concentration to lower concentration (of water), down water potential gradient

(b)

- 1 temperature rise increases the rate of transpiration / evaporation / ORA;
- 2 warm air can contain more water (vapour) / ORA;
- 3 increases concentration gradient / ORA;
- 1 increasing light increases the rate of transpiration / ORA;
- 2 increasing light stomata open further / ORA;
- 3 allows more diffusion / ORA;
- decreasing humidity increases the rate of transpiration / evaporation / ORA;
- 2 drier air increases concentration gradient / ORA;
- 3 more water vapour lost / ORA;
- 1 increasing wind speed increases the rate of transpiration / ORA;
- 2 more air movement removes saturated air / ORA;
- 3 away from stomata / (leaf) surface;

any two factors - 2 marks max each

[4]

[Total: 7]

Read response as two separate paragraphs.

Responses may include factor in description. No credit for naming factor.

I - ref. to time of day
